

NAME

getsid – get session ID

LIBRARY

Standard C library (*libc*, *-lc*)

SYNOPSIS

```
#include <unistd.h>
```

```
pid_t getsid(pid_t pid);
```

Feature Test Macro Requirements for glibc (see **feature_test_macros(7)**):

```
getsid():
```

```
    _XOPEN_SOURCE >= 500
```

```
    || /* Since glibc 2.12: */ _POSIX_C_SOURCE >= 200809L
```

DESCRIPTION

getsid() returns the session ID of the process with process ID *pid*. If *pid* is 0, **getsid()** returns the session ID of the calling process.

RETURN VALUE

On success, a session ID is returned. On error, *(pid_t) -1* is returned, and *errno* is set to indicate the error.

ERRORS**EPERM**

A process with process ID *pid* exists, but it is not in the same session as the calling process, and the implementation considers this an error.

ESRCH

No process with process ID *pid* was found.

VERSIONS

Linux does not return **EPERM**.

STANDARDS

POSIX.1-2008.

HISTORY

POSIX.1-2001, SVr4. Linux 2.0.

NOTES

See **credentials(7)** for a description of sessions and session IDs.
